MOSCOW (AP) — A court in Russia has granted bail to a U.S. citizen accused of espionage who was detained on espionage charges a month ago. The 17-page ruling released Friday by the Moscow regional court says Karina Dyusheva, who goes by the name Nina, can be released from custody only if she surrenders her passport. The court says Nina could be tried in absentia. Karina Julia Dyusheva, who was born Ksenia Romanova, goes by the alias Nina, and was arrested in Moscow on Aug. 7 along with her husband, Artem Dyushev. They were charged with spying under Article 276 of Russia's criminal code and accused of collaborating with a foreign intelligence service to obtain "special information which could be used by a foreign power to damage Russia's defense capability." FIFA: The world's biggest sports franchise - authentic club football at its best. Just like in real life, every aspect of playing football has been captured in the game. From putting your foot on the ball with an authentic passing motion to the runs of each player, from the drama of a shoot-out to the tackles and everything in between - it's all there in FIFA. FIFA 22 is the most authentic football experience to date. FIFA 22 is an authentic football experience that makes no compromises to the gameplay and emotion of football. Every move is judged on its gameplay value, whether it was done right or wrong. The result is that FIFA captures all the drama, excitement and pure emotion of football. Introducing a new era of innovation For the first time ever, the full FIFA development team is working side-by-side with the game's producer to create the experience of real football. This new way of working delivers on the theme of FIFA being Powered by Football™. Today we can share some more details with you about the innovations we're delivering in FIFA this year. At its heart, we've changed what it means to play a team like Liverpool. We are working with our development partners to ensure that the real Liverpool is accurately represented in this new era of FIFA. The back-room staff, the training and the equipment: a fully realised detail-packed 3D model which depicts both the club and players as never before. This is just one example of the many innovations coming to FIFA this year. World-class on-field intelligence Huge improvements to every player's AI, where they move and the way they tackle are based on an understanding of how they would tackle in real life and the precision with which they turn. This provides the biggest on-field intelligence in FIFA to date, as players move dynamically in all three-dimensional space - not staying still when they have already been judged out of space. It means that for the first time ever, a player will run at full speed if the call for a challenge was not made. For example, if a player spots an opponent advancing towards his goal, he will still run to make the challenge. Ultimately, tackling is now the most cinematic and believable aspect of real-life football. Improved ball controls From the way the ball rolls
